PROJECTS

Airline Management System   **July 2024**
- This robust platform facilitates effective scheduling of flights, seamless air ticket reservations, and prompt handling of flight cancellations.
- Key features include dynamic customer support modules and efficient staff management tools. The system also provides real-time updates on daily flight statuses, enhancing operational awareness and customer satisfaction.

EmergeBazaar E-commerce Website   **Mar 2021 - Dec 2022**
- Managed frontend architecture and implemented key features such as dynamic product cards, local storage-based cart management, and toast notifications for enhanced user interactions.
- Optimized for performance with Vite, ensuring fast loading times and a seamless shopping experience.

Premier Clothing Website   **Feb 2020 - Jan 2021**
- Created "Premier," a clothing brand website using HTML and CSS animations.
- The site features stylish, dynamic visuals and user-friendly navigation, enhancing the online shopping experience with smooth, engaging animations and an elegant design.
